The Doctoral Consortium will take place on June 20 and 21. The committee is formed by the following researchers:

**Chair:** Àngel García-Cerdaña (IIIA)
Ricardo Toledo (CVC)
Sergi Robles (UAB)
Karina Gibert (UPC)
Núria Agell (ESADE)
Juan Antonio Rodríguez-Aguilar (IIIA)
Pedro Meseguer (IIIA)

Every student will have 15 minutes to explain his/her PhD progress and plans and 15 minutes more to discuss with the members of the committee. There are three members of the committee that will have read each PhD report before the presentation but the discussion is open to all members. Students should bear in mind that the level of the explanation should be such that it has to be understood by an audience with knowledge in AI but not in the specific area of interest and should give special importance to the impact that the PhD can potentially have. Presentations are to be done in English.

The coffees and lunch (on the 20th) of the students and members of the committee will be free.

Those students whose name is marked in italics will do their presentation via Skype, they should send their Skype nickname to doc@iiia.csic.es and be ready ten minutes before the scheduled time. The schedule of the presentations is the following:
